Symptom (öffentlich)

Problem (öffentlich)

How may I use the Open Street Map data in ArcGIS? I know how to download the data, but would like to directly access the data.

Solution (öffentlich)

In ArcGIS 10 you may access data from ArcGIS Online which also contain the Open Street Map data by simply clicking the menu option "File > Add Data > Add Data From ArcGIS Online...":

Please enter "Open Street Map" into the search field [1] and search [2] for the data. Once found, you may add the WMS Service by clicking the Add-button (+) [3]
